RANGE

How to read a card

Top notes

The first scent you notice: there at once, usually fades first.

Heart notes

The character of the fragrance: comes forward as the top notes fade.

Base notes

The foundation: develops slowly and usually lasts longest.

The duration of the layers is a general explanation, not a promise of hours. On skin it depends on skin type, amount and surroundings.

Longevity and sillage

Dots from 1 to 5, see below.

Season

The seasons in which the fragrance fits best.

DOTS	LONGEVITY: HOW LONG THE FRAGRANCE STAYS ON THE SKIN	SILLAGE: HOW FAR IT IS NOTICED
●○○○○	short	close to the skin
●●○○○	fairly short	subtle
●●●○○	medium	medium
●●●●○	long	strong
●●●●●	very long	far-reaching

Longevity and sillage are our own internal assessments, from 1 to 5. On skin it can differ.
